OUR CURRICULUM INTENT AT CARDINAL POLE

Achieving a love of learning means creating lifelong learners and a thirst for knowledge.

Lovers of learning also become independent learners as they are **confident** in what they do know but also in that they do not know yet.

KS3: Lovers of Learning

KS4: Subject Masters

Acquiring a deep, long-term, secure and adaptable understanding of the subject.
Achieving mastery means acquiring a solid enough understanding of the subject that ideas from one area can be applied to another.

Critical Scholars are willing to share their work with an understanding that it is part of a much wider body of ideas and practices. They are able to listen and appreciate a range of views before coming to a carefully considered and well-presented view.

KS5: Critical Scholars

YEAR 10 CURRICULUM OFFER, 2020-21

Dear Parents / Carers,

At Cardinal Pole, our students sit at the very heart of our curriculum. In addition to teaching subjects for their intrinsic value, the purpose of our curriculum is to empower our students, further social justice and prepare them for citizenship within and outside of our school community.

At GCSE, all students study English Literature and English Language, Maths, Science (combined or separate) and RE in addition to three option subjects chosen at the end of Year 8. Subjects are taught in a combination of double and single 50 minute periods as per the timetable below:

Subject	Periods	Subject	Periods	Subject	Periods
English	5	Option A	3	Physical Education	1
Maths	5	Option B	3		
Religious Education	3	Option C	3		
Science	6				

Students also have timetabled: a weekly PSHE lesson on a Thursday morning and a daily 30 minute Prep session with their tutor to support with the completion of homework. All year groups celebrate Mass once a half term in addition to the liturgies held at the end of each term.

To provide students with a bespoke place of learning, our state of the art library is open to all students before school, at breaktime, lunchtime and after school. In addition to lunchtime enrichment (p.5), there is a free breakfast club for all students before school from 7.30am; after school there are homework clubs and sports clubs running daily.

We believe that our students deserve the very best education and, to ensure that we meet these aims, we have outlined a clear curriculum plan for each key stage (p.3). As a result of this rich curriculum offer, we expect our students to become subject masters by the end of Key Stage 4 so that they are ready to embark on the next stage of their curriculum journey as they begin their post-16 education studies in Year 12.

For any further information on the curriculum, please do not hesitate class teachers or a member of the pastoral team:

Head of Year: Mr L Tavares		
Pastoral Support Manager: Mr C Daniel		
SEN Link: M	r D Douglas	
10 Arrowsmith	Ms S Loughney	
10 Campion Mr S Clark		
10 Clitherow Mr D Malyon		
10 Line	Mr J Crotty	
Ms E McGuinness		
10 More Ms H Coonan		
10 Southwell Ms I Clancy		
10 Ward	Ms C Haley	

Yours sincerely,

Ms E Connolly

Associate Deputy Headteacher – Curriculum, Assessment & Outcomes

EXTRA-CURRICULAR OFFER, 2020-21

There are a wide range of extra-curricular activities for students to engage with whilst at Cardinal Pole, these will run before school, after school and during lunchtimes.

There is something for everyone:

Mathmagicians

Mandalas

Trampolining

Photography

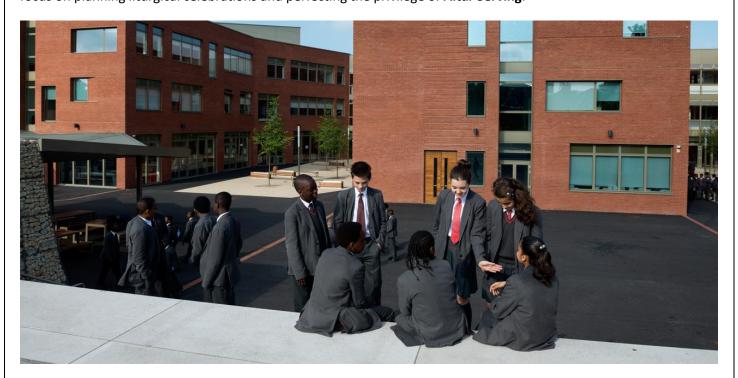

Climate Club

Chess Club

History Club

... and many more!

In addition to these clubs and the many more available, **Homework Club** continues to run from Tuesday-Thursday for students who might need a little assistance with completing their work and **Liturgy** clubs continue with a new focus on planning liturgical celebrations and perfecting the privilege of **Altar Serving**.

MEASURING PROGRESS: YEAR 10

At Key Stage 4, students are assessed according to their GCSE targets. The purpose of this is to focus on the progress they have made since Year 7 in comparison to how their peers perform nationally. Target grades are based on KS2 scores from primary school against national expectations for high levels of progress but are not considered to be a glass ceiling. The attainment of students at each assessment point is then assessed as either above / on / below target grades

In non-core subjects, students are taught in mixed ability option blocks. Within these teaching groups, student progress is measured against their own individual targets. In contrast, KS2 scores and End of Year Assessments are used to set students for their core subjects (English, Maths, Science and RE).

Class teachers assess student progress continuously through verbal and written feedback on both class and homework. As a whole school, data is collected twice a year during Assessment Point 1 (December) and Assessment Point 2 (June). During these weeks, all students follow a personalised exam timetable schedule, the results of which are reported back to parents in written reports. These reports will indicate whether a student is well above / above / on track / below / well below expectations in each subject in relation to their target.

Where progress is not in line with expectations after AP1, students will be supported with a bespoke intervention programme run by the pastoral team which will take place on Thursdays. To monitor the progress of these students and support them in overcoming barriers to their learning, these students will sit a smaller cycle of exams in selected subjects at Easter also.

This is a critical year in your child's education and we aim to work alongside parents to ensure our students achieve the best possible outcomes at the end of Year 11. To support this, there is one Parents' Evening held in Spring term which is focused specifically on AP1 and identifying successes as well as gaps in knowledge that need addressing before moving into Year 11.

SUBJECT		CC	MPUTER SCIENCE
Subject Lead		N	/Ir G Braithwaite
OCR GCSE in Co		mputer Science	
Paper 1: Computer systems		50%	Written Exam, 1 hour 30 minutes
Paper 2: Computational thinking, algorithms		50%	Written Exam, 1 hour 30 minutes
and programming			
Compulsory Programming Project		0%	20 timetabled hours

Autumn Term

Computer Hardware:

In this unit you will learn about: The purpose of the CPU, The Von Neumann architecture, Common CPU components and their function, How common characteristics of CPUs affect their performance & Embedded systems In addition you will learn about: The purpose of Memory: What is meant by RAM, Virtual Memory & ROM. You will also look at various storage devices and in what situation is best to use each type.

Networks and the Internet:

In this unit you will look at Network topologies such as MESH, star, LAN & WAN. In addition you will look at network protocols & layers.

What we

teach and

why

Programming 1:

In this unit you will explore programming concepts such as sequence, selection & iteration. Carefully looking into the difference between the For and While Loops. How we can use the nested for Loop to iterate through a list in order perform a Sort of an array.

Spring Term

Data Representation:

In this unit you will explore how computers use binary to represent binary. You will perform some conversions from Denary to Binary & Hexadecimal and look at how images & sound are represented in binary. You will create a python solution that will assist in converting denary into binary & Hex and vice-versa.

Binary Logic:

In this unit you will explore how computers use binary to represent binary. In addition you will look at logic gates and logic circuits including AND, NOT & OR gates along with truth tables and how to interpret logic circuits

Programming 2:

You will look at extending our use of Python by using procedures & functions in your created programs along with file handling such as reading/writing to a CVS/txt file.

Algorithms:

The first lesson introduces the concepts of computational thinking; abstraction, decomposition and algorithmic thinking. Lessons on standard searching and sorting algorithms are followed by two lessons on developing algorithms using flow diagrams and pseudocode. The unit finishes with a lesson on interpreting, correcting and completing algorithms.

Summer Term

Moral, Legal and Ethical:

In this unit we explore the evolution of computers over time and how this has had an impact on us, the laws that protect us and the different impact in relation to the Social & moral issues.

System security and software:

In this unit you will look at various security threats and identify what we can do to prevent them. Analysing strategies such as: Encryption, Anti-Virus, Anti-Malware software to protect a system. Also looking into the various types of Operating systems and utility software.

Programming Project:

Tasks to develop their practical ability in the skills developed in components 01 and 02. They will have the opportunity to define success criteria from a given problem, and then create suitable algorithms to achieve the success criteria. Students then code their solutions in a suitable programming language, and check its functionality using a suitable and documented test plan. Finally they will evaluate the success of their solution and reflect on potential developments for the future.

	Autumn Term	Spring Term	Summer Term
What we teach and why	Autumn Term Paper 1, Thematic study (Crime & Punishment) and historic environment (Whitechapel) Studying Crime and Punishment allows students to develop their own rational about what should be considered a crime and how society should treat people. Students develop their sense of chronology further so that they can explain how and why crimes, punishments and law enforcement has changed over time. Key Concepts: -Monarchy; Church; Rights and responsibilities; Technological change; Liberalism; Social justice	Paper 1, Thematic study (Crime & Punishment) and historic environment (Whitechapel) Students will complement their learning on Crime and Punishment over time by conducting a depth source enquiry into Whitechapel in 1888 and why the police were unable to catch the murderer known as 'Jack the Ripper'. Students develop their ability to read sources critically and how to conduct their own source enquiry. Key Concepts: Rights and responsibilities; Technological change; Liberalism;	Paper 2: British depth study (B4: Early Elizabethan England) Having previously studied Crime and Punishment in the Tudor period, students can now use that knowledge to build on their sense of period, through a depth study of Elizabethan England. This allows students to understand a key moment in English history, where England started being more outward facing and connecting with the wider world. This module explores the impact of religious change on England and then how Elizabeth managed to maintain her grip on a deeply divided land.

Autumn Term Spring Term Summer Term Students focus on basic number Students focus on number work Construction is a hard topic to work to consolidate their but special numbers such as LCM, grasp and exposing the students numeracy skills that they HCF and Standard form. to that early on in their encountered in the previous year secondary school life is essential Progressing onto improving their such as BIDMAS and Directed algebra skills with factorising and for their continued progress number. They then focus on 3D expanding brackets including hence why we do bisecting shapes touching on surface area double brackets. Then finish off angles, bearing and Loci. The and volume to improve their with Transformations that they students are then taught Interest, knowledge of shapes. Students have encountered before such as Tree Diagrams and Conditional finish off with algebra that they reflection, rotation, translation Probability. have encountered in the previous and enlargement but also year but also some new content touching on Column vectors. With the spiral SOW in place the such as simultaneous equation What we and solving quadratics. students get the chance to encounter these topics next year teach and In half term 2, students still focus also. why on Number work but now focusing on the four operations In half term 4, students will be of fractions and building on it moving onto the much harder with topics such as percentage data topics that they may have change and Interest. Then they not encountered previously such will encounter ratio & proportion as Histograms, Cumulative and progressing onto harder ratio Frequency. Basic angle work to topics such as Recipe style start off progressing onto much questions as this is now one of harder angle work such as the 5 big topics in GCSE exams. Trigonometry and Pythagoras, Algebraic Direct and Inverse touching on 3D Trigonometry. proportion will also be covered. Then the focus shifts onto real The students will then revisit life graphs and plotting nonsampling and Venn Diagrams. linear graphs.

SUBJECT		MODERN FOREIGN LANGUAGES: FRENCH	
Head of Department		Mr J Lunn	
Paper 1: Listening	25%	Writte	en Exam, 35 minutes (Foundation) / 45 minutes (Higher)
Paper 2: Speaking	25%		Oral Exam
Paper 3: Reading	25%	Written Exam, 45 minutes (Foundation) / 1 hour (Higher)	
Paper 4: Writing			Exam, 1 hour (Foundation) / 1 hour 15 minutes (Higher)

Autumn Term Year 10 starts with the transition topic of free time and media. Students learn how to describe their usage of technology, as well as a review of Y8 topics of TV, film and books. Students learn how to add sophistication to their opinions, narrate events in both past and future tense, and apply their ideas to a GCSE style extended writing task. vocabulary of family and What we personal/physical descriptions teach and

why

HT2 sees students reviewing their such that they are able to explain their relationships with their friends and family members. Students are also afforded an indepth re-cap on conjugating present tense verbs (both regular and irregular), with a view to preparing students towards their AP1 examinations, where they are given their first taste of tasks in the key assessment skills of listening, reading and writing.

Students begin the new year by

Spring Term

reviewing the Y7 topic of home and local area, scaling from vocabulary for landmarks and giving directions to being able to compare town and countryside and explain the problems in their region. Students also gain a recap of weather vocabulary, and gain transactional language for describing potential activities upon arrival in a French town.

Students build on the skills and language from HT3 to be able to narrate their holiday experiences and preferences. Students learn how to describe their usual habits on holiday, memorable holidays from the past, and what their ideal holidays might look like through an introduction to the conditional. Students also prepare towards their first experience of GCSE style speaking tasks, centring on the topic of holidays.

Summer Term

Students complete their preparation for their speaking tests by practising asking and answering questions in the target language and peer assessing their answers. As this is completed, students also acquire the transactional language to book hotels, and leave reviews thereof, describing problems and issues they have had on holiday in the past.

Students prepare for AP2 by recapping their knowledge of topics from HT1-5. Students revisit core vocabulary, grammar and structures in consolidation material and prepare for their first full mock GCSE experience across all 4 key skills of speaking, listening, reading and writing. Afterward, students undergo a thorough review of their exams and identify key areas for improvement as they go into Y11. Students close out the year with a look into French culture, through the history and geography of the Francophone world.
